## Ultra-Shield Detection

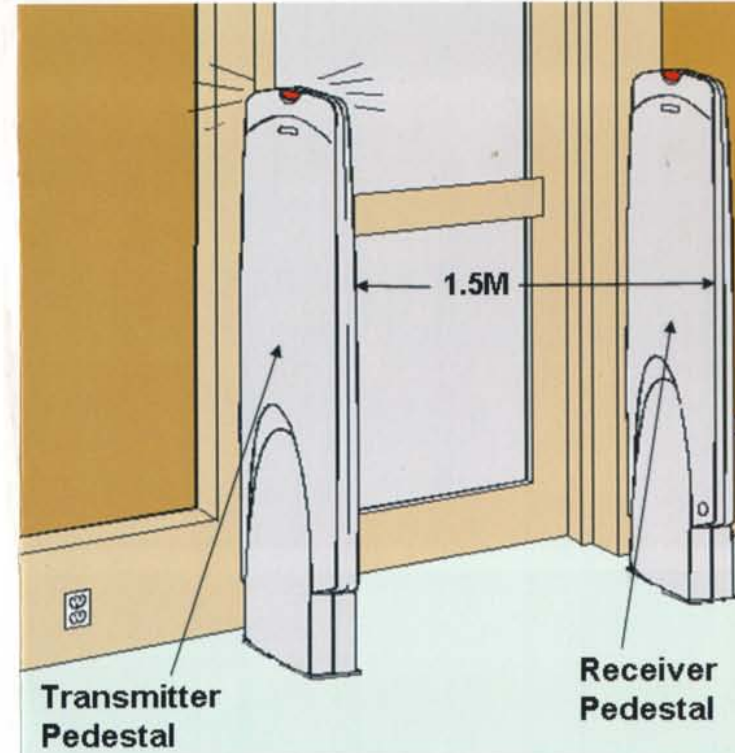

helping to make your stores  
safer and more profitable

## Package Offering:

(A) Ultra-Shield Dual + Detacher with lock + 1,000 AM Hard Tag

Losses due to shoplifting, employee theft, administrative errors and vendor fraud can be a drain on your bottom line. In fact, the 2007 Global Retail Theft Barometer reports shrink alone cost retailers in India nearly US\$2.4 billion.

To help protect your stock and reduce loss, Sensormatic is proud to introduce the Ultra-Shield detection system. Ultra-Shield is an affordable electronic article surveillance system specially designed for the smaller retailer.

Our EAS solutions are based on Ultra-Max®, the authentic Acousto-Magnetic technology, which is the preferred solution of the world's largest retailers. AM is the most advanced EAS technology and gives the highest performance with virtually no false alarms.

Any item in your store can be protected with a Sensormatic® hard tag or label, thus reducing your shrinkage and increasing profits!

## An investment that you can ill afford to miss.

(B) Ultra-Shield Dual + Versa Pass Table top + 5,000 AM Label

### Ultra-Shield Features:

- **Coverage\*.**  
Designed to cover a variety of door widths ranging up to 1.5m
- **Easy installation.**  
The pedestals bolt to the floor and simply plug into an ordinary electrical outlet.
- **Reliability.**  
System will automatically phase to the nearest Ultra-Max® system to ensure dependable operation and performance while reducing the need for service.
- **Self diagnostics.**  
Alerts store personnel via a visual alarm when tagged merchandise is displayed too close to the pedestals.
- **Robust design.**  
Constructed with high impact polystyrene material for strength and durability.

\* Coverage is dependent on site condition.
